ip-converge™

Empowering Business.

IP-Converge™ is an Internet data center, telecommunications and cloud services company, providing local and regional enterprises with managed data services and business solutions at international standards.

IP-Converge™ is a wholly-owned subsidiary of ePLDT, Inc., the Information & Communications Technology (ICT) arm of the Philippine Long Distance Telephone Company.

Compliant* with ISO 9001:2008 Quality Management Systems and ISO 27001:2005 Information Security Management Systems, the foundation of the company's business is customer satisfaction, ensured through high-quality on-time service delivery, best practices, and a personalized "boutique" approach to clients.

The company offers superior packages of integrated IT services to businesses, institutions and other service providers. These world-class solutions include Internet data center services, dedicated Internet connectivity, network security, and a host of enterprise cloud services that help clients minimize the cost and effort from doing "IT" themselves.

IP-Converge has been in the enterprise cloud computing space even before the term was coined. The company is the country's first and only Salesforce.com Cloud Alliance Partner providing **Salesforce CRM** licenses and consulting services to businesses. IP-Converge is also the country's premier **Google Enterprise Partner** paving the way for local organizations to adopt a cloud computing mindset and to **ThinkOutCloud™**. True to this "cloudvocacy", the company offers its own suite of cost-efficient cloud services ranging from Infrastructure-as-a-Service (IaaS) to Software-as-a-Service (SaaS) through its web portal **cloud.com.ph** powered by a robust cloud platform hosted in its own Internet data center.

IPC® Data Centers are state-of-the-art, telco-grade facilities built to support various enterprise IT and telecommunications requirements 24x7. Locators are guaranteed of utmost service quality and availability, as well as access to IP-Converge's robust international network infrastructure. The company helps Philippine businesses tap into the global market by providing highly reliable Internet and connectivity solutions including bandwidth capacity on the Intra-Asia Cable (IAC) system (connecting Singapore, Hong Kong and Japan), as well as the best DDoS (Distributed Denial of Service) Mitigation services in the world through its partnership with world leader in network security Prolexic Technologies.

Being truly carrier-neutral, the IP-Converge network is peered with all major domestic telcos and Internet exchanges in the region such as HKIX (Hong Kong Internet Exchange) and Equinix IX, two of Asia's largest global telecommunications hubs, thus allowing high-speed connectivity from the Philippines to the rest of the world.

True to its brand promise of **Empowering Business.™**, IP-Converge's mission is to ensure that its customers achieve their business goals through value-driven Internet solutions. With only the best business relationships, its world-class data center and network infrastructure, fully-trained professional staff, and a clearly defined mission that benefits customers, IP-Converge is the ideal partner for IT and telecommunications services.
